Residents who live in zip codes at higher risk of eviction and other socio-economic vulnerabilities will be fast tracked for assistance if they are at 50% or below the median income. Approximately 50% of the funding will be handled by immediately assisting applicants that meet these requirements.

For all other areas that are not considered high risk for eviction or other socio-economic vulnerabilities, renters at 50% of the median income or below will be able to apply and will be assigned to a Service Planning Area (SPA) based on their zip code. A formula used for the Federal Community Development Block Grant Program that takes into account population, poverty, and overcrowded housing, will be used to allocate the remaining 50% of funding available by SPA. A lottery of eligible applicants will be run at the end of the application process.
